

Bushboard Brings Back Budget Baseline

Bushboard Washroom Systems have re-introduced their budget cubicle range, Baseline.

Back by popular demand, Baseline delivers Bushboard's trade mark quality and design at affordable prices and features robust extruded aluminium pedestal legs, continuous headrail and sturdy die cast metal door hinges powder coated in smart Charcoal Grey finish.

Available in materials suitable for dry areas, the range can be delivered in just 2 weeks through Bushboard's Modular Service option and is available in a range of 8 contemporary colour tones, carefully selected to offer real flexibility for colour schemes.

Kevin Cliffe, Bushboard's Commercial Director decided to re-launch Baseline based on customer feedback. "We are continually listening to what the market needs and with the current demand for affordable products re-introducing Baseline was the obvious choice. The system is tried and tested having previously been in the Bushboard range for a number of years. The overall look

of the range is stylish and most importantly we do not compromise on the quality of fittings which are also used across other products in the Bushboard range.”

He added, “This means Baseline truly is a cost-effective, hard wearing and smart washroom solution”.

A complementary range of vanity units and ducting solutions are also available to complete any washroom environment.

For further information on Baseline visit www.bushboard-washrooms.co.uk or call 01933 303160.
