

# Modular panel sizes

Our modular panel sizes work with every type of duct and sanitaryware option including WCs, urinals and wash hand basins.

With modular you have flexibility with both height and width. By simply cutting top and intermediate flashgaps to size on-site you can adjust the overall height and width of your installation. All cut panel edges are concealed behind access panels.

Shown here are adult height sanitaryware options. Children's height options are available as part of our bespoke service option.

The heights of the panel sections up to 2000mm are fixed.

Varying ceiling heights can be achieved by selecting the appropriate top panel section as the chart below and adjusting the top flashgaps from a minimum of 25mm to maximum of 200mm.

Ceiling height	Top panel section height
2280mm to 2480mm	150mm
2475mm to 2675mm	345mm
2625mm to 2825mm	495mm
2755mm to 2955mm	625mm
2905mm to 3105mm	775mm
3100mm to 3300mm	970mm
